

# Mongolian Geoscientist

Vol. 52, issue. 26, pp 1-1  
DOI: <https://doi.org/10.5564/mgs.v51i0.1461>

## Editorial

### PREFACE

We are pleased to present the newest volume of the Mongolian Geoscientist.

From this new issue, we will use volume and issue numbering according to the Journal Publishing Practices and Standards (JPPS) criteria.

The new volume 26, issue 52 contains five original papers presented with distinct authorship from different countries of China, USA, Russia and Mongolia. Published articles are focusing on issues of geology, geochemistry, geochronology, topography, cartography and ore deposit geophysics and new earthquake happen in 2021, Mongolia.

Although Covid-19 situation makes it difficult to conduct geological field research, researchers are pleased to publish new findings. I would like to thank all authors who have submitted their research results and the editors and invited reviewers who are kindly contributed to the publication of this issue. I believe that all papers published in this volume will have a great contribution to the Geoscience research, academic and professional field.

First issue of the Mongolian Geoscientist was published in October 1996. This October is just 25 years, a quarter century, since this first publication. We invite you to publish your research in a special issue.

Batkhisig Bayaraa

Editor-in-Chief
