

## Preface

Mongolian Journal of Chemistry provides a unique forum for the publication of significant and original work across a variety of disciplines including chemistry, biology, physics, chemical engineering and material science, which is likely to be of interest to the multidisciplinary community that the journal addresses. Readership-MJC coverage is highly relevant to a variety of industrial and academic sectors including: pharmaceuticals; analytical science; coal and petrochemistry, bio- and nanotechnology; and materials science.

The Editors at *Mongolian Journal of Chemistry* are committed to publishing high quality new work which makes a significant contribution to the both academic and industrial sectors development. In order to meet this aim, submitted manuscripts were evaluated by the professional MJC Editors to ensure they meet essential criteria for publication in the journal. We have received over 30 papers from scientists working on a broad range of natural science. The second issue of Mongolian Journal of Chemistry (38th issue for Annual scientific reports) includes 28 papers. We thank you for your submission to our journal and look forward to get another submission next year.
